E. SESSION SUMMARY:

The target is a city located near water.

There are many man-made structures. There is one particular tall, narrow, building that is of interest, it has something long and narrow sticking out of the end of it. But there are many tall buildings evident. It is a crowded, loud and noisy place, with winding roads and much activity. There is "smokey" smell in the air which makes me think of inner city pollution. There are people, some are walking, someone else is walking a dog, and the movement of many cars. There is something that starts out slow, and then speeds up; it reminds me of some kind of energetics. There is a large, cylindrical shape that has energetics inside of it (colors are red, green, and blue), red seems to be the dominating color.

Visually I seem to have a "global" view of this city, as if from above, almost a distorted view, curved in some way. Probable location of the city is in the United States, possibly midwest (AOL: Chicago or Minneapolis).

1. All five sources agree on the presence of an evident land and water interface that is associated with the target. Indeed the emphasis was placed on the concept of "water" There were two principal concepts associated with the target. The first appeared to deal with a structure whose shape appeared to be cylindrical or oval. There appeared to be a historical and a religious significance attached to the target structure. In a second instance, the target was described as a airport. And one viewer described the structure as a dam.
